Crimping **Wiring kits**

Macrography
Kits

Since 2007, to complement our wiring activities, OTN developed a custom kitting activity to facilitate the wiring of electrical cabinets.

Based on your wiring diagrams and configuration standards, our technical department performs the conversion of your data to generate wiring lists.

Those lists will be used directly by:

- Our production units, to produce the wiring kits and harnesses
- Your teams to wire cabinets, without needing wiring diagrams

Our solutions for wiring kits and harnesses have many advantages:

- Savings
- Timeliness
- Quality (automated machines)
- Standardized productions

To be able to answer your requests, our company recently purchased a second fully automated KOMAX wiring unit.

www.otnsa.com

We can produce the following wiring kits:

- Sections from 0,34 mm² to 6 mm²
- Black or white Ink-Jet marking (others colors available)
- Wires of any color, halogen free or not
- Automated crimps for preinsulated or non insulated terminal

Our dedicated equipment:

- Two automated wiring units: Komax Zeta 633 L and Komax Ara
- Cutting machines for wires and cables
- Stripping machines (up to 200 mm²)
- Marking / tracking by ink or sleeves
- Crimping machine for wires and cables
- Traction control on electrical terminals
- Macrographic analysis equipment

Wiring kits, that's our job !
